| Parameter  | Value             | Corr. MoM   | Gestational age                |
| PAPP-A   | 17.45 mIU/mL      | 3.14  | 13 + 0                         |
| fb-hCG   | 40.87 ng/mL       | 1.11  | Method                         |
|  |                   |   | CRL Robinson                   |
|  |                   |   | Scan date                      |
|  |                   |   | 13/07/24                       |
|  |                   |   | Crown rump length in mm        |
|  |                   |   | 70                             |
|  |                   |   | Nuchal translucency MoM        |
|  |                   |   | 0.97                           |
|  |                   |   | Nasal bone                     |
|  |                   |   | unknown                        |
|  |                   |   | Sonographer                    |
|  |                   |   | N A                            |
|  |                   |   | Qualifications in measuring NT |
|  |                   |   | MD                             |
| Risks at sampling date   |                   | Trisomy 21  |                                |
| Age risk   | 1:1043            | <p><b>The calculated risk for Trisomy 21 (with nuchal translucency) is below the cut off, which indicates a low risk.</b></p> <p>After the result of the Trisomy 21 test (with NT) it is expected that among more than 10000 women with the same data, there is one woman with a trisomy 21 pregnancy.</p> <p>The PAPP-A level is high.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!</p> <p>The patient combined risk presumes the NT measurement was done according to accepted guidelines (Prenat Diagn 18: 511-523 (1998)).</p> <p>The laboratory can not be hold responsible for their impact on the risk assessment ! Calculated risks have no diagnostic value!</p> |                                |
| Biochemical T21 risk   | <1:10000          |   |                                |
| Combined trisomy 21 risk   | <1:10000          |   |                                |
| Trisomy 13/18 + NT   | <1:10000          |   |                                |
|  |                   |   |                                |
| Trisomy 13/18 + NT   |                   |   |                                |
| <p><b>The calculated risk for trisomy 13/18 (with nuchal translucency) is &lt; 1:10000, which represents a low risk.</b></p> |                   |   |                                |
