

DEPARTMENT OF CYTOGENETICS

Patient Name	Mr. ANANDA KUMBLE	Visit ID	YOD754934	Barcode	11133304
Age/Gender	32 Y / MALE	UHID/MR No	YOD.0000727602	Collected Date	04-07-2024 04:42 PM
Ref. Doctor	Dr. SELF	Client Name	SAGE PATH LABS PVT LTD	Registration Date	04-07-2024 04:16 PM
Hospital Name		Client Code	YOD-TS-0435	Received Date	05-07-2024 11:42 AM
Sample Type	SODIUM HEPARIN BLOOD	Branch	Ameerpet	Reported Date	12-07-2024 05:36 PM

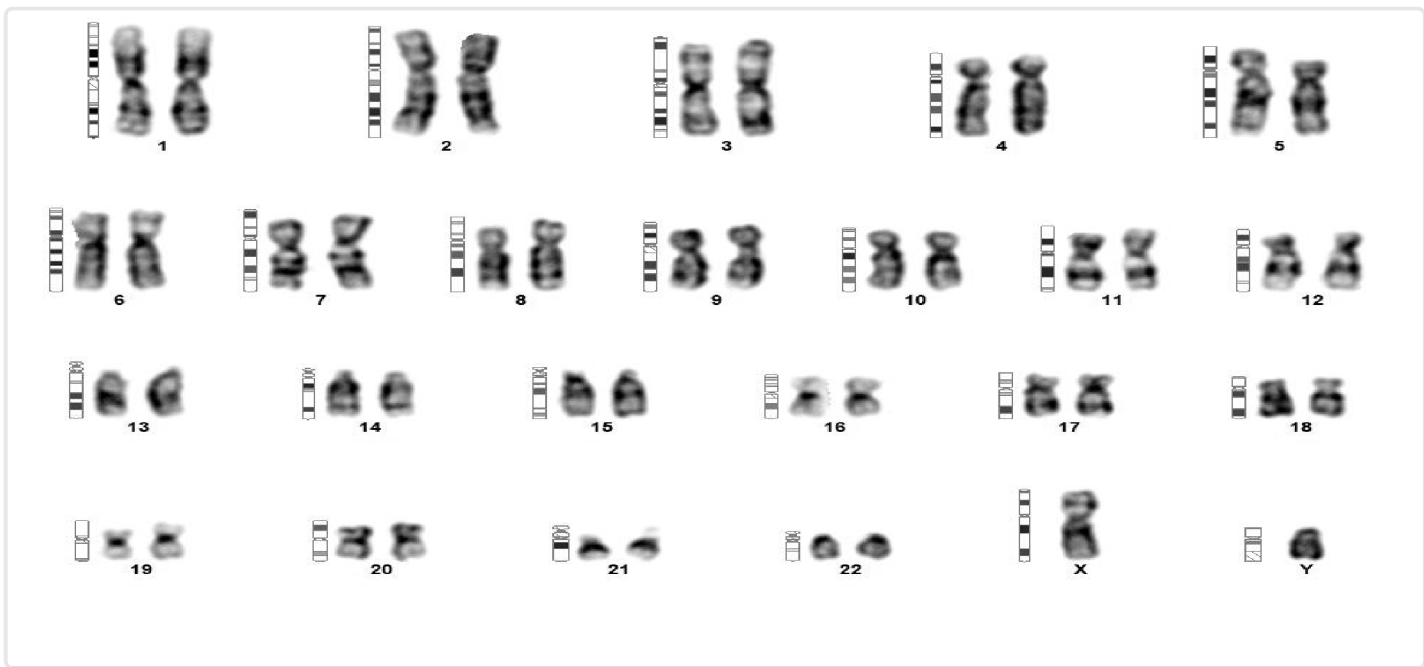

CHROMOSOMAL ANALYSIS-KARYOTYPING

SAMPLE RESULTS

Sample Type	Peripheral Venous Blood.
Quality of Sample	Good.
Yoda Cytogenetics Number	CYG-24-PB-1161
Clinical Indication	Not provided
Test Requested	Karyotyping on Blood sample.
Test Methodology	Stimulated Peripheral Blood lymphocyte culture.
No of cells counted	20
No of cells Karyotyped	05
Estimated band resolution	400-500 bphs
Banding method	GTG
ISCN	2020

Initial ☒

CYTOGENETICS REPORT -CYG-24-PB-1161

DEPARTMENT OF CYTOGENETICS

Patient Name	Mr. ANANDA KUMBLE	Visit ID	YOD754934	Barcode	11133304
Age/Gender	32 Y / MALE	UHID/MR No	YOD.0000727602	Collected Date	04-07-2024 04:42 PM
Ref. Doctor	Dr. SELF	Client Name	SAGE PATH LABS PVT LTD	Registration Date	04-07-2024 04:16 PM
Hospital Name		Client Code	YOD-TS-0435	Received Date	05-07-2024 11:42 AM
Sample Type	SODIUM HEPARIN BLOOD	Branch	Ameerpet	Reported Date	12-07-2024 05:36 PM

Karyotype

46,XY

Interpretation

Chromosomal analysis of PHA stimulated Peripheral Blood lymphocytes revealed a normal male chromosomal complement without any structural and numerical chromosomal abnormalities in all the cells examined from multiple cultures, within the limits of the current technology.

Disclaimer

1. This assay allows for microscopic visualization of numerical and structural abnormalities.
The limitation in size of the chromosomal abnormalities like deletion(interstitial and terminal) , translocation, inversion , duplication(interstitial and terminal) and other structural aberrations size from >5mb to 10mb.
2. Sample received without relevant clinical history , family history , previous medical reports related to cytogenetics and microarray will not be accepted .The lab is not responsible for any deviation in interpretation of the assay as a result of not being provided the necessary relevant clinical information.
3. Sample not received in appropriate containers or not collected optimally may lead to poor GTG banding and low resolution and therefore have high chances of missing structural abnormalities. The lab does not address the problems related to inappropriate sample collection and handling (preanalytic issues)
4. Test results are based on the sample received in the department and the results and interpretation are in the context of the demographic details received along with the sample.
5. Reporting TAT may be delayed due to the unsought circumstances and extra workout and repeat culture and clinical correlation with other parameters.
6. Test results are reported as per updated and current version of ISCN.
7. Partial reproduction of the report is not permitted
8. The content of the report may be used for research purpose without revealing the personal information of the subject.
9. Detection of heterogeneity of the clonal cell population in the specimen (i.e., mosaicism) is limited by the number of cells analyzed and karyotypes per report.
