## SONOGRAPHY OF ABDOMEN AND PELVIS

The Real time, B mode, gray scale sonography was performed.

LIVER :The liver is normal in size shape and has smooth margins. It is uniformly isoechoic, has normally distributed and normal size biliary and portal radicles and is without solid or cystic mass lesion or calcification.

GALL BLADDER :The gall bladder is seen as a well distended, pear shaped bag with uniformly thin and regular walls, without, gall stones or mass lesions.

COMMON BILE DUCT :The common bile duct is normal in caliber. No evidence of calculus is noted in common bile duct.

PANCREAS :The pancreas is normal in size, shape, contours and echotexture. No evidence of solid or cystic mass lesion is noted.

KIDNEYS :The kidneys are normal in size and have smooth renal margins. Cortical echotexture is normal. The central echocomplex does not show evidence of calculus or hydronephrosis.

SPLEEN : The spleen is normal in size and shape. Its echotexture is homogeneous. No evidence of focal lesion is noted.

URINARY BLADDER :The urinary bladder is well distended with normal wall thickness.

PELVIS .The uterus is bulky in size measuring  $9.75 \times 5.39 \times 6.73$  cm. Endometrial thickness is 10.9 mm. No focal lesion seen. No adnexal mass is seen.

No free fluid is noted in the cul-de-sac.

No free fluid in the peritoneal cavity

The bowel loops are unremarkable.

OPINION : - BULKY UTERUS.
