| Patient data  |                 | Ultrasound data   |               |   |
|---|-----------------|---|---------------|---|
| Name  | Mrs. KIRAN BALA | Gestational age at sample date  | 12 + 3        |   |
| Birthday  | 06/06/86        | Method  | Scan          |   |
| Age at sample date  | 38.2            | Scan date   | 05/07/24      |   |
| Patient ID  | 0472408190065   |   |               |   |
| Correction factors  |                 |   |               |   |
| Fetuses   | 1               | IVF   | no            | Previous trisomy 21 unknown pregnancies |
| Weight in kg  | 68              | diabetes  | no            |   |
| Smoker  | no              | Origin  | Asian         |   |
| Pregnancy data  |                 | Parameter   | Value         | Corr. MoM                               |
| Sample Date   |                 | PAPP-A  | 2.5mIU/mL     | 0.76                                    |
|   |                 | fb-hCG  | 41.12 ng/mL   | 1.00                                    |
| Risks at sampling date  |                 |   |               |   |
| Age risk at sampling date   |                 | 1:126   | Trisomy 21    | 1:426                                   |
| Overall population risk   |                 | 1:600   | Trisomy 13/18 | 1:4912                                  |
| Risk  |                 | Trisomy 21  |               |   |
|   |                 | <p><b>The calculated risk for Trisomy 21 is below the cut off which represents a low risk.</b><br/>           After the result of the Trisomy 21 test it is expected that among 426 women with the same data, there is one woman with a trisomy 21 pregnancy and 425 women with not affected pregnancies.<br/>           The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician.<br/>           Please note that risk calculations are statistical approaches and have no diagnostic value!</p> |               |   |
| Trisomy 13/18   |                 |   |               |   |
| <b>The calculated risk for Trisomy 13/18 is 1:4912, which indicates a low risk.</b> |                 |   |               |   |
