Dr. Gaurav Mohabey
Consultant Radiologist
MBBS, DMRE (Mumbai)
Reg No. 2010/04/1484

Shop No. B/13, Neelgagan Cooperative Housing Society, Balraj Marg, Besides RNH Hospital, Dhantoli, Nagpur - 440012

USG – OBSTETRICS (ANOMALY SCAN)

Date : 14/09/2024
Name of Patient : PRIYANKA VIPUL GAIKWAD
Ref by : Dr. RIJU ANGIK CHIMOTE, Vaunshdhara Fertility Centre

LMP: 20/04/2024

Menstrual age: 21 wks 0 days

Single intrauterine fetus with variable presentation.

Fetal body movements & cardiac activity appear normal.

Fetal heart rate regular and normal. FHR : 132 bpm.

No obvious sonographic fetal congenital anomaly seen for this G. A. & fetal position
(All congenital anomalies can not be ruled out specially facial, extremities & cardiac).

FETAL BIOMETRY:

	cms	wks /days
BPD	4.7	20/2
HC	18.8	21/1
AC	15.5	20/5
FL	3.6	21/3

Sonic Gestational Age : 20 wks 6 days.
Sonic EDD : 26/01/2025
Sonic fetal weight : 395 gms

Head : Shows normal shape and contour.
The midline structures appear normal and maintained.
Cavum septum pellucidum is seen.
Ventricular system is normal and show normal measurement.
Posterior fossa appears normal. Transcerebellar diameter is within normal limits.

Spine : Vertebrae appears normal in configuration. No obvious evidence of defect.

Thorax : Intra-thoracic structures appears normal.

Heart : Situs appears normal. Normal 4 – chambers view.
RVOT and LVOT appears normal.
FHS within normal limits and regular.
