Name	: MRS. SUPRIYA AMOL SAWANT	Age/Sex	: 32 YEARS/F
Ref By	: Dr. SUNITA PADALKAR	Date	: 08 Oct 2024

Conclusion:

- A single live intra uterine fetus of 11 weeks and 4 days gestational age.
- No fetal anomalies detected at present gestational age.

A targeted anomaly scan is recommended at 18-22 weeks gestational age.

Correlation with serum markers (PAPP-A & Beta HCG) for aneuploidy is advised.

Disclaimer:

This ultrasonography study has been performed with due care and diligence. However, it is well known that not all the congenital malformations of the fetus can be diagnosed and that some of them can be overlooked in spite of careful scrutiny. Moreover, detection of fetal anomaly is very much dependent on gestational age and position of the fetus at the time of ultrasonography study. Hence, if any of the congenital anomaly remains undetected, it is accidental and not intentional. The Radiologist has always the best interest of the mother and her baby in his/her mind.

* I **MRS. SUPRIYA AMOL SAWANT** declare that by undergoing ultrasonography /image scanning etc. I do not want to know sex of my fetus.

Signature of pregnant women.*

I **DR. CHIRANJEEVI MUGALE**, declare that while conducting ultrasonography /image scanning etc. on **MRS. SUPRIYA AMOL SAWANT**, I have neither detected nor declared sex of her foetus to anybody in any manner.

SCREENING ULTRASONOGRAPHY FOR ANEUPLOIDY

Findings:

L.M.P. - 20/07/2024

Gestational age by L.M.P. - 11 weeks 3 days

E.D.D. by L.M.P. - 26.4.25

Uterus is gravid. A single intra uterine fetus is seen.

Cardiac pulsations are well seen. **FHR- 176 bpm**

There are no obvious congenital anomalies at present gestational age.

Internal os : Closed. Liquor : Adequate.

Placenta: posterior in location. Cervical length : 3.8cm

Screening parameters for aneuploidy:

Nuchal translucency (NT): 1.3mm.

Nasal bones: Seen.

Ductus venosus doppler: Triphasic wave pattern.

Ventricles: Normal size.

Real time pulsed Doppler done with color flow mapping.

	RI (cm/sec)	PI (cm/sec)	S/D Ratio
Right uterine artery	0.62	0.92	2.66
Left uterine artery	0.41	0.61	1.70

Fetal growth parameters:

CRL: 4.7cm

Expected date of delivery according to USG: 25.4.25
