## DIAGNOSTIC CENTER

► 3 D, 4 D Sonography

► Colour Doppler

► Digital X-Ray

**Mob. 9096787104**

In Front of Aakar Furniture, Near HDFC Bank, Patel Nagar, Paithan. **Mob. 9096787104**

**Name: Mrs. YOGITA SACHIN AUTE**

**Date: 04-Oct-2024**

**Age: 26 Y**

**Study: NT SCAN**

**Sex: F**

**Ref By: Dr. ASHWINI A MAHAJAN MADAM**

### **First trimester aneuploidy markers.....**

The nuchal translucency measures 1.3 mm.

The fetal nasal bones are seen and appear normal.

The fetal tricuspid valve and the ductus venosus reveal normal flow pattern.

### **Fetal anatomy.....**

There is no evidence of any sonographically detectable anomaly noted in visualized parts of the fetus at present scan.

Cranial vault is normal and intact.

Fetal face appears normal.

Spine appears normal.

The stomach bubble and urinary bladder is seen.

All four limbs are seen and normal for present gestational age.

### **Uterine arteries.....**

#### **MEAN UTERINE ARTERY PI 1.4(12TH CENTILE)**

#### **Impression:=====**

- ❖ Single, live fetus in variable presentation, corresponding to sonographic age of 13 weeks 04 days with adequate liquor.
- ❖ The fetal sonographic age is corresponding to the period of amenorrhoea.
- ❖ The expected date of delivery as per present examination is 07/04/2025.
- ❖ The nuchal translucency measures 1.3mm. (12th centile)

**Suggest- Detailed anomaly scan between 18 to 20 weeks.**

=====

**Thank you for kind reference**

**With warm regards**

(Note- This is not detailed anomaly scan. It must be noted that detailed fetal anatomy may not be always visible on ultrasonography due to technical difficulties related to fetal position, amniotic fluid volume, fetal movements and maternal anterior abdominal wall thickness. Therefore all fetal anomalies may not be necessarily detected at every ultrasound examination. All measurements including fetal weight are subject to statistical variations).

## ULTRASOUND EXAMINATION OF GRAVID UTERUS (NT SCAN)

### Observations:

- Single, live fetus is seen in **variable presentation**.
- The fetal body movements and cardiac activity appear normal.  
The fetal heart rate is 148 beats per minute.
- The placenta is **posterior** in location with grade 0 maturity. low lying touching internal os  
There is no placenta previa.  
There is no evidence of intraplacental or retroplacental hematoma.
- The three vessel umbilical cord is seen with normal placental and fetal insertions.
- The liquor volume is adequate.
- The **cervical length** measures 35 mm.  
The internal os and cervical canal appear closed.

The fetal gestational parameters are as follows:

LMP: 07/07/2024    Gestational age by LMP : 12 weeks 05 days    EDD by LMP; 13/04/2025

- Fetal biometry:**

	mm	Corresponding	
		weeks	days
<b>Crown Rump Length</b>	75.2	13	04

- Bilateral adnexae are normal.  
No evidence any adnexal lesion is seen.  
No evidence of any myometrial lesion.
