

Name : MR. BALASAHEB BHONDAVE
Ref By : Dr. M. G. SASANE

Age/Sex : 75 YEARS/M
Date : 30 Sep 2024

USG : ABDOMEN & PELVIS

Liver: is normal in size, shape & echotexture. Intrahepatic biliary radicals & veins are normal.

Porta-hepatis : CBD and portal vein are normal in calibre and appear normal.

Gall Bladder: Gall bladder lumen and wall is normal.

Pancreas: visualised pancreas appears normal, body and tail is not well visualised.

Spleen: is normal in size, shape & echotexture.

Right kidney: is normal in size (104 x 46 mm), shape & echotexture. Cortical thickness is normal.

Left kidney: is normal in size (105 x 48 mm), shape & echotexture. Cortical thickness is normal.

Both kidneys shows mild prominent pelvi calyceal system.

Bladder: is over distended & normal in outline. Foley's bulb within.

Prevoid volume = 372 cc

Prostate: Is enlarged in size (64 x 62 x 58 mm =124 cc), s/o gross prostatomegaly.

Bowel loops: Visualised small bowel loops appear normal in calibre & peristalsis, colonic fecal loading and gases seen. Appendix and rest all details are not seen due to overlapping bowel gases.

Visualised retroperitoneum, aorta , IVC appears normal.

No e/o free fluid in peritoneal , pleural cavities.

IMPRESSION:

- Gross prostatomegaly.
- Both kidneys shows mild prominent pelvi calyceal system, likely due to over distended urinary bladder.

Many thanks for referral.

(Above USG report is subject to findings evident at the time of scan & associated bowel gases. This modality has its own limitations & should be considered as a professional opinion. Clinical correlation is advised to arrive at a diagnosis.)
