## DEPARTMENT OF RADIODIAGNOSIS AND IMAGING ULTRASOUND OF NECK

### Findings:

Both lobes of thyroid are normal in size and echotexture.  
Right lobe of thyroid measures 1.1 x 1.5cm.  
Left lobe of thyroid measures 1.5 x 1.5cm.

Isthmus measures 1.5mm.

No focal lesions.

Bilateral parotid & submandibular glands are normal.

Neck vessels are normal.

Multiple cervical lymphnodes noted bilaterally largest measuring 1.7 x 0.8cm at level II on right side, left side measuring 1.5 x 0.8cm at level II.

Enlarged right intraparotid lymphnode noted measuring 5.3mm.

### IMPRESSION:

- **Normal study of thyroid gland.**
- **Cervical lymphadenopathy.**

- Suggest clinical correlation.
