"Raj Mansion", Near Hinoo Bridge, Opposite Eyelex, Hinoo, Ranchi-834 002  
Jharkhand, INDIA. • Mob.: 7070700916

Name : JYOTI KUMARI, 26YRS/F.

USG of : Foetal Wellbeing (NT Scan)  
10.11.2024

Date : Dr. SUMEDHA GARGY, MBBS MD MRCCO

Ref. by Dr.

**Dr. Jitendra K. Singh**

MD (Radio-diagnosis)

Chief Consultant Radiologist

Trained at : Porz Hospital  
Cologne, Germany

ULTRASONOGRAPHY TRANSVAGINAL SONOGRAPHY SMALL PARTS SONOGRAPHY SONOSALPINGOGRAPHY

## THANKS FOR THE REFERRAL

Single, viable, intrauterine foetus is noted.

Foetal cardiac pulsations are regular. Heart rate is 152beats per minute.

Foetal movements are normal.

CRL measures 64.6mms corresponding to 12wks 6days  $\pm$ 2wks maturity.

Placenta is fundus-posterior. Placental maturity is grade 0.

Liquor is adequate.

Cervix measures 34.7mms. Internal os is closed.

EDD by USG measurements is 19/ 05 /2025  $\pm$ 2wks .

Nuchal translucency is only 1.9mms and is within normal limits.

Nasal bone is seen.

A subserous hypoechoic lesion is seen in fundus of uterus, measuring 111.0mms X 89.9mms (approx).

## IMPRESSION: USG study is suggestive of :

- Single intra-uterine viable foetus of 12wks 6days  $\pm$  2wks maturity.
- Fibroid uterus .

*I declare that I have not disclosed the sex of the foetus in any manner to any body.*

**Note :** Ultrasound reports are prepared on the basis of images created by different machines, of the parts or organs of an individual under study and their interpretation by doctors who are trained for the purpose. However, it must be realized that like many other clinical sciences, the science of clinical imaging is not perfect and suffers from technical limitations. There are also differences in their interpretation by different experts. Although these reports are prepared with care, they should not be used for medico-legal purposes, on account of these limitations. This must also be understood that in cases of obstetric ultrasonography despite best efforts, with good equipment and best trained radiologist, all congenital anomalies may not be detectable.
