**IMPRESSION** : \*Single live intrauterine gestation corresponding to 18 wks and 01 days in breech presentation.

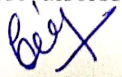

**Declaration**:I have neither detected nor disclosed the sex of fetus in any manner or to anybody. This scan is mainly done for estimation of gestational age,amount of liquor,fetal well being and placental position and is not for the fetal anomaly evaluation.

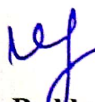

Advised follow up scan for interval growth .

Advised TIFFA scan between 20-24 weeks

FOR CLINICAL CORRELATION

I Agree That detailed fetal anatomy may not always be visible due to technical difficulties , Sex of the fetus not disclosed to me in any manner
