

# Asha Diagnostics

USG (Ultrasound), Digital XRAY  
Colour Doppler

**Dr. Anupam Shrivastava**

MBBS, DMRE (Mumbai)  
Consultant Radiologist  
Reg. No. MP 7768

Consultant- • Golden Heart Hospital, • Supra Diagnostics • Shalby Hospital • Ex. Consultant - Gastro and Liver Care Hospital

Abdomen: gastric bubble present, KUB, 3 vessel cord normal, abdominal wall intact.

Extremities: Right arm (incl hand), left arm (incl hand), right leg (incl foot), left leg (incl foot) appears normal for GA, normal alignment for this gestational age and position.

Toes and digits could not be assessed due to position.

No obvious demonstrable lesion seen at this GA and fetus position, however few abnormalities may develop in later stages of life.

This is basic level II anomaly scan to rule out lethal gross abnormalities, cardiac, neuro, extremities, facial.

Genetical fetal abnormalities may not be noted by this scan and second opinion can always be taken to reduce the risk associated.

## IMPRESSION:

Single live fetus presently in cephalic presentation of about 19 w 5 d +/- 1 w 0 d.  
No obvious fetal congenital malformations visualised sonologically.

LMP: 24/07/2024.

GA by date 18 w 6 d.

CUA: 19 w 5 d +/- 1 w 0 d.

EDD by USG: 24/04/2025

I Dr Anupam Shrivastava declare that while conducting ultrasonography I have neither detected nor disclosed sex of her fetus in any manner.

Please correlate clinically/ Follow up.

Name of the patient : Mrs. Rupali Gupta 32 yrs/F

Referring Doctor : Dr. N V Motghare DGO

## USG Level II- Target Scan, REPORT

There is a single live fetus presently in cephalic presentation with regular fetal movement and regular cardiac activity.

Fetal heart rate is about 146 /min.

Gestational age was estimated by measuring BPD: 49.3 mm; HC: 167.6 mm, AC : 147.5 mm, FL: 30.7 mm corresponding to about 19 w 5 d +/- 1 w 0 d.  
EFBW: 313 +/- 47 gms, 92.6 percentile.

Amniotic fluid is adequate ( AFI 12).

Placenta is posterior, upper segment and away from internal os ( Grade I).

Umbilical cord with three vessels is well visualised. Internal os is closed.

Cervical length is adequate 33 mm. Mean Uterine PI 1.1.

### Anomaly survey

Head: intact cranium/ normal shape. Midline falx, Thalami, Ventricles and cerebellum appears normal for GA. No obvious intracranial lesion.

Spine: NAD.

Orbits and bulbs: Lips and face, nasal bone- no obvious gross lesion for this GA and position.

Chest: 4C heart, 3V view, maintained. Fetal echo not done.

Lungs: Both lungs appear normal.
