IMAGING CENTER

(A Unit of Advitiya Imaging And Medical Systems Pvt. Ltd.)

FACILITIES

1.5 TESLA DIGITAL MRI | ANGIOGRAPHY | COLOR DOPPLER
HIGH SPEED MDCT | ULTRASONOGRAPHY | DIGITAL X-RAY

PT. NAME	MRS. PARUL YADAV	AGE	23/FEMALE
REF. DOCTOR	DR. SWAPNA SINGH BAIS MADEM	DATE	09/12/2024

OBSTETRIC ULTRASOUND-TARGET SCAN

LMP: 22/07/2024

GA BY LMP: 20 weeks and 00 days

A single live intrauterine foetus with cephalic presentation at the time of scan

Foetal Parameter:

	Cms	Corresponding to	Weeks	Days
BPD	4.6	Corresponding to	20	1
HC	17.8	Corresponding to	20	2
AC	14.7	Corresponding to	20	0
FL	3.3	Corresponding to	20	2
Tibia	2.7	Corresponding to	20	0
Fibula	2.8	Corresponding to	20	1
Humerus	3.1	Corresponding to	20	3
Radius	2.7	Corresponding to	20	3
Ulna	2.7	Corresponding to	20	1
Gestational age as per USG			20	2
Effective fetal weight by USG	339 gram $\pm$ 15 gram			
EDD as per USG	26/04/2025			

Foetal cardiac activity: is regular. Foetal heart rate is 174 beats/min.

Foetal body and limb movements are observed.

Placenta: is on anterior uterine wall well lower end of placenta 2 cm. away from internal OS shows grade- I maturation.

Liquor: is adequate in amount for the gestational age. AFI 12.2 cm

Internal os: Closed. Cervical length 3.7 cm

Umbilical cord: 3 vessels cord is seen. Placental insertion is central. No cord around the neck is seen.

Head: Appears normal in size and shape. Both lateral ventricles appear normal in size. Midline echoes appear normal. Cisterna Magna. No SOL is seen.
