#### Disclaimer :

Please note that USG study has certain limitations. Some times a foetal anomaly may not get diagnosed. Ultrasound is a screening tool and not a diagnostic tool. The presence and limitations of machine, the absence of mention of foetal anomaly in study does not always mean and does not imply that the anomaly is not present in the foetus.

**Declaration** - I declare that while conducting Ultrasonography/ Image Scanning on patient, I have neither detected nor disclosed the sex of her fetus to anybody in any manner.
