OPEN FOR ▶ Mon. to Sat.
9:00 AM to 9:00 PM

On Sunday
9:00 AM to 1:00 PM

Dr. Vilas Gavhane

MBBS, MD (Radio-Diagnosis)

- FMF Certified - (11-13 weeks)
- Ex. SMO LTMMC and Sion Hospital Mumbai.

For appointment Contact : 9172177662 | 9970740705

Address : Ground Floor, Shri Krishna Apartment,
Kate Puram Chowk, Pimple Gurav-Pune-411027.

Patient Name : Mr. Deepak Thorat
Referred By : Dr. Smita Wable

Age/Sex : 35/M
Date : 22.01.2025

Clinical Profile: Swelling-

Ultrasound of Local Part-Right Cheek

Method: Real-time Sonography of local part was performed with a high frequency probe on GE Voluson BT22 machine.

Observation & Impression:

- ◆ E/o hypoechoic collection/area of size 2.2x0.9x1.2cm is seen along the inferior gingivo-buccal region extending to right ramus of mandible inferiorly and right cheek laterally and superiorly having no obvious blood flow within it-most likely suggestive of infective etiology-dental caries with abscess formation-needs further evaluation with CECT/MRI and histopathology for further evaluation to rule out rare possibility of neoplastic etiology.
- ◆ No significant cervical lymphadenopathy seen.

Clinical correlation and further evaluation is suggested.
Thanks for the reference....with regards....

Dr. Vilas Gavhane
MBBS, Dr. Vilas Gavhane
MD Radio-Diagnosis

Note- This modality has its own limitations and the impression should be considered as a professional opinion and not final diagnosis. The report must be correlated with clinical findings and other relevant data. This report is not valid for Medico-legal purposes. Kindly review/follow up if clinical mismatch is there.
