

SAHYOG DIAGNOSTICS

SONOGRAPHY, MRI, CT-SCAN

X-RAY, COLOR DOPPLER, PATHOLOGY

Dr. YUVRAJ

MD (Radiodiagnosis), DMRD (Gold Medalist)
Ex. Sr. Resident Hamidia Hospital, Bhopal
Ex. Consultant Sanya Diagnostics, Bhopal
Ex. Consultant Siddhanta Red Cross, Bhopal
Reg. No. MP17584

Pt. Name:	MRS. REKHA SAHU	Age/Sex:	29 Years /Female
Ref. By:	SHREE BALAJI MULTI-SPECIALITY HOSPITAL	Date:	02/03/2025

USG WHOLE ABDOMEN

- **Liver** is normal in size, shape and echotexture. No evidence of any focal lesion is seen. No intrahepatic biliary dilatation is seen. **Portal Vein, CBD** are not dilated.
- **Gall bladder** well distended and is normal. No evidence calculi/wall thickening is seen.
- **Pancreas** Head, part of body visualized normal.
- **Spleen** measures 8.2 cm, normal in size, shape and echotexture.
- **Right kidney** measures approximate 10.2 x 4.4 cm. Normal in size, shape & echotexture. CM differentiation is maintained. PCS compact.
- **Left kidney** measures approximate 10.3 x 4.7 cm. Normal in size, shape & echotexture. CM differentiation is maintained. PCS compact.
- **Urinary Bladder** – Well distended. Normal wall thickness with normal contents.
- **Uterus** is anteverted and bulky in size (12.0 x 9.4 x 6.8 cm). The myometrial echogenicity is heterogeneous. **Large posterior myometrial fibroid of size ~10.1 x 8.4 x 7.7 cm is seen causing compression and anterior displacement of endometrium.** The endometrial lining is compressed and normal in thickness (~7 mm).
- **Bilateral ovaries** are normal in size, shape and position. **Bilateral adnexa** are clear.
- No free fluid is seen in the abdominal cavity.

Impression: USG study reveals bulky uterus with large posterior myometrial fibroid of size ~9.2 x 7.7 cm causing compression and anterior displacement of endometrium.
