Surgical Pathology Report

- Clinical History :**

C/O Right breast lump.

- Specimen :**

Right breast lumpectomy for HPE.

- Gross :**

Received in formalin is well oriented (Short thread- Superior) lumpectomy specimen of "Right breast lump" measuring 6x5.5x5cm. Overlying skin flap measuring 5.5x1cm. On serial sectioning well defined grey white tumor identified measuring 4.5x4x4cm. Distances of tumor from various cut margins are:
Anterior(Skin): 1cm, Posterior(Base): 0.1cm, Superior: 0.1cm, Inferior: 1cm, Medial: 0.1cm, Lateral: 1cm.
Representative sections submitted: 01- Anterior cut margin with tumor, 02-Posterior cut margin with tumor, 03 - Medial cut margin with tumor, 04- Lateral cut margin, 05- Superior cut margin with tumor, 06 - Inferior cut margin, (07-09) - tumor.

- Microscopy :**

Procedure: Lumpectomy

Specimen laterality: Right

Tumor focality: Unifocal

Tumor size: Greatest dimensions - 45mm + Additional dimensions - 40x40mm

Histologic Type : Invasive carcinoma of no special type (ductal, not otherwise specified)

Histological features: Tumor infiltrating lymphocytes seen. Large areas of necrosis seen. Tumor margins are pushing margins.

Histologic Grade (Nottingham Histologic Score):

- Glandular (Acinar)/Tubular Differentiation -Score 2

- Nuclear Pleomorphism - Score 3

- Mitotic Rate - Score 3

Overall Grade : (2+3+3=8) Grade 3

Ductal Carcinoma In Situ (DCIS): Present

+ Architectural Patterns -Comedo, solid type

+ Nuclear grade - Grade III (High)

Margins: All cut margins are free of tumor. Superior, Posterior (Base) and Medial cut margins are very close (0.1cm) but free of tumor.

Lymphovascular emboli: Not identified

Perineural invasion: Not identified

HPR No. : KD25/175

Additional findings: Adjacent breast parenchyma shows fibroadenosis.

Impression : Right breast lump: lumpectomy;
Invasive ductal carcinoma of no special type, Grade 3, (45mm), DCIS - Present, comedo & solid type,
All cut margins are free of tumor (Superior, Posterior and Medial cut margins are close (0.1cm) but free of
tumor. Lymphovascular emboli/Perineural invasion not seen.

Note: Any remaining grossed specimen will be discarded after 3 months.
