Disclaimer: -Please note that USG study has certain limitations. Sometimes the fetal anomalies may not get diagnosed due to nature of anomaly. Gestational age, foetal positioning and limitations of machine hence absence of mention of foetal anomaly in study does not always rule out its possibility.

• (Fetal echo is not conducted in this scan; hence cardiac anomalies cannot be ruled out).

Declaration: - I declare that while conducting Ultrasonography/ Image, scanning on patient, I have neither detected nor disclosed the sex of the fetus to anybody in any manner.
