Referred By : DR. ANJALI KALE RATNAKAR  
Age : 25 YEARS Sex : F

Date : 19 Apr 2025

### USG OBSTETRICS: ANOMALY SCAN

A single live foetus is seen in variable lie.

Heart activity and foetal movements are normal. FHR-152/min.

Placenta is anterior. There is no placenta praevia.

There is no evidence of any obvious congenital anomaly noted on present examination in present foetal position.

Liquor is adequate.

Internal os is closed. Cervix measures 42.56 mm.

#### **HEAD**

Lateral ventricles normal atrium 6 mm.

Cerebellum normal.

Cisterna magna normal.

No identifiable intra-cranial lesion.

#### **NECK:**

No cystic structure seen around neck.

#### **SPINE:**

Entire spine visualized in long and transverse axis.

Vertebrae and spinal canal appears normal.

No evidence of neural tube defect or protrusion.

#### **FACE:**

Face seen in coronal and profile view.

Both orbits, nose and mouth appears normal.

No evidence of facial cleft.

#### **THORAX:**

Heart appears in the mid position with apex to left.

Normal cardiac situs.

Four chambers view normal.

Outflow tracts normal.

Both lungs seen.

No evidence of pleural or peri-cardial effusion.

No evidence of SOL in thorax.

**ABDOMEN:**

Abdomen situs appears normal.

Stomach and bowel normal.

Normal bowel pattern appearance for gestational age.

No evidence of ascites. Abdominal wall intact. Diaphragm normal. No CDH.

**KUB:**

Both the kidneys and bladder normal.

A three vessel umbilical cord is seen-two arteries and one vein noted.

**LIMBS:**

All foetal long bones visualized and appear normal for period of gestation.

Both hands and feet normal.

Vessel	P.I.	Percentile
Rt Uterine artery	0.64	3
Lt uterine artery	0.74	

**GROWTH PARAMETERS:**

Parameter	Measurement	Gestational age	Percentile
Biparietal diameter	52.56 mm	22w0d	83.4 Percent
Head circumference	192.94 mm	21w4d	64.6 Percent
Abdominal circumference	163.85 mm	21w3d	58.2 Percent
Femur length	30.51 mm	19w5d	7 Percent
Humerus length	30.77 mm	20w1d	17.9 Percent
Average maturity	21w1d		
Estimated foetal weight	376 g		

**IMPRESSION.**

Single live foetus in variable lie, of average maturity of 21w1d

A follow-up is advised after 4 wks.

EDD assigned as per dating scan: 30/08/2025

Last menstrual period: 23/11/2024

Expected gestational age: 21w0d

*This is to certify that I have neither detected nor disclosed the sex of the foetus to anybody.*
