Declaration: I have neither detected nor disclosed the sex of the fetus of pregnant women to anybody as laid in rule 3B (1A)

None

1) This is a Professional Opinion only and not the final Diagnosis.

2) No ultrasonography finding is pathognomonic, all findings are only suggestive, hence they should be reviewed with the relevant clinical examination & relevant investigations before embarking upon the final Diagnosis and proceeding for Management (Medical or Surgical)

3) No all gross congenital anomalies of fetus are apparent during scanning due to difficult & variable position attained by the fetus. Hence this USG cannot exclude all gross congenital fetal anomalies. Fetal cardiac anomalies are not included, ask for fetal echocardiography whenever suspected.

4) Whenever suspect congenital anomalies, ask for targeted scan along with serum alpha fetoprotein estimation.

5) In case of Disparity between clinical and Sonographic/X-ray findings, please send patient again for review.

6) This report is not valid for medico legal purposes.
