I DR. SUKRATI SHRIVASTAVA declare that while conducting ultrasonography on MRS. POOJA RAGHUWANSHI, I have neither detected nor disclosed the sex of her fetus to anybody in any manner. NB: This is not an anomaly scan, ultrasound scanning cannot detect all fetal anomalies. Even though this scan has been performed as per current international guidelines for fetal imaging, certain anomalies go undetected due to technical limitations, maternal body habitus, unfavorable fetal positions or subnormal amount of liquor. This report is not valid for any medicolegal aspect. The fetal cardiac anomalies are detected by fetal echo only.
