Patient Name :

MRS. RIFAT PARVEEN

Sr. No. :

81

Sex / Age :

25 Y / F

Date :

02-06-2025

Clinical Indication :

USG ANOMALY SCAN

Ref By :

DR. A. K. NETAM

USG REPORT - ANTENATAL TARGETED ANOMALY SCAN

Established by due date: **03-11-2025**

GESTATION AGE AS PER Established: 18 weeks 0 days

Observation: Single intrauterine gestation.

Maternal:

Internal Os is closed. Cervix measures 4.3cm in length.

Survey:

Placental - Posterior gr.-0 low lying 1.3cm from Internal os.

Liquor - Normal. AFI-8.4cm

Umbilical cord - Three vessel cord

Fetal Movement - Present

Cardiac activity - Present.

Fetal heart rate - 150Bpm.

Presentation: Cephalic

FETAL MEASUREMENTS:

Biometry	Measurements	Gestational age
BPD	3.7cm	17W 4D
HC	14.1cm	17W 3D
AC	12.2cm	17W 6D
FL	2.6cm	17W 6D

HL	2.6cm	18W 1D
UL	2.3cm	18W 3D
RAD	2.1cm	17W 6D
TIB	2.2cm	17W 6D
FIB	2.2cm	17W 5D
BOD	2.7cm	17W 5D
IOD	1.2cm	
TCD	1.8cm	18W 0D
CM	4.1mm	
NF	3.2mm	
LV	6.1mm

Fetal Anatomy:

NS

Midline falx seen, no deviation of midline structures seen.

Cavum septum pellucidum seen.

Both lateral ventricles appears normal.

Grebelium appears normal.

NECK

Fetal neck appears normal.

No obvious cystic or solid mass lesion seen.

SPINE

Entire spine visualized in longitudinal and transverse axis.

No evidence of significant open neural tube defect.

FACE

Fetal face seen in the coronal and profile views.

Both orbits and mouth appears normal.

Premaxillary triangle is seen.

THORAX

Cardiac situs, size and axis are normal.

Four chamber and three vessel views appears normal.

Both lungs seen. No evidence of pleural or pericardial effusion.

ABDOMEN

Stomach and bowel appears normal.

No evidence of ascites. Abdominal wall is intact.

No obvious dilated bowel loops seen.

KID

Both kidneys and bladder appears normal.

EXTREMITIES

All fetal long bones visualized and appear normal for the period of gestation.

Both feet appears normal.

IMPRESSION:

- Single viable intrauterine fetus corresponding to 17 weeks 6 days of gestation in Cephalic Presentation.
- EDD by USG: 04-11-2025
- No detectable gross structural congenital anomaly seen in present scan.
- Placenta- Posterior gr-0 low lying 1.3cm from internal os.
- Liquor - Normal (AFI- 8.4cm)
- Estimated fetal weight according to BPD, HC, AC, FL : 213+/- 31gms.
- Fetal ECHO not included in this scan.
- No cord around neck.

Note: Subtle cardiac, ear, cosmetic limb appearance (E.g. Polydactyly and Syndactyly), GI Tract anomalies, cataracts, umbilical cord knots, small dorsal dermal sinus, tongue anomalies, occult spina bifida, isolated cleft palate, 20 % of cardiac anomalies may not be detected by USG. Some anomalies appear only in later gestation. Serial scans are necessary.

I Dr. MAYANK GOYAL declare that while conducting ultrasonography of MRS RIFAT PARVEEN have neither detected nor observed the sex of her fetus in any manner.

ULTRASOUND OBSTETRICS

Urinary Bladder : Normal in outline.
No evidence of obvious stone / mass.

Uterus : Shows evidence of regular gestational sac with small embryonal pole inside.
CRL → 21.8mm → 8Wks 6Days.
Embryonal pole movement seen.
Cardiac pulsation present (178bpm)
Amniotic fluid adequate.
Decidual amplitude well seen.

- EDD BY USG :- 03/11/2025 ± 2Weeks

- LMP : 13/01/2025

- EDD BY LMP : 20/10/2025

IMP. SINGLE INTRA UTERINE LIVE FETUS (8 WEEKS 6 DAYS) WITH NORMAL FETAL MOVEMENT & CARDIAC ACTIVITY SUGGESTIVE OF EARLY PREGNANCY.

Adv. Follow up.
