SONOGRAPHY OF ABDOMEN & PELVIS

The liver is normal in size, shape and echotexture. There is no evidence of any focal lesion. There is no intrahepatic biliary dilatation. The hepatic veins and IVC are normal. The portal vein is normal in course and caliber. The gall bladder is adequately distended, wall thickness is normal. There is no evidence of any intraluminal abnormality. The CBD is not dilated. The spleen is normal in size 7.5 cm and echogenicity. Pancreas is normal in size and echogenicity. No MPD dilatation/calcification noted.

Right kidney measures 8.5 x 3.8 cm. It is normal in size, shape and echo texture. There is no evidence of hydronephrosis, calculus disease or cortical scarring in right kidney.

Left kidney measures 8.5 x 4.6 cm. It is normal in size, shape and echo texture. There is no evidence of hydronephrosis, calculus disease or cortical scarring in left kidney.

Both kidneys show raised cortical echotexture however CMD is maintained

There is no pre-para-aortic adenopathy noted. Bowel loops show normal caliber, wall thickness and peristalsis. Appendix appears normal.

The urinary bladder is well distended, & reveals no intraluminal abnormality. Wall thickness is normal. Mucosa appears normal. Foley's bulb noted in situ.

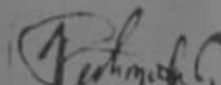

Prostate is enlarged in size measuring 42 cc.

No ascites noted.

Pericardial wall appears thickened with minimal pericardial effusion.

IMPRESSION:

- Moderate prostatomegaly.
- Both kidneys show raised cortical echotexture however CMD is maintained
- ? Pericarditis.
