

## OBSTETRIC USG REPORT

**Oracle Clinic**  
**5<sup>th</sup> Floor**  
**Ananya Ascent**  
**Deo Nagar Square**  
**Nagpur**

						clinical correlation is required for deciding a treatment plan
Patient Name	Bhagyashree Gadekar	Ref By	SELF	Self	Date	8/7/25

### Report

SINGLE live intrauterine pregnancy.  
amount of amniotic fluid.

Normal fetal cardiac activity. Fetal Heart Rate 151/mt

Fetal body and limb movements normal.

Nasal bone, Stomach bubble, Calvarium & Limb buds well visualized.

Spine appears normal

Cervix appears normal. Internal os is closed. Cervical length 3.7cms

EDD is 17/1/26 EDD According to USG : 17/1/26

### Fetal parameters -

BPD	1.7cm	12.3 WEEKS
CRL	5.9cm	12.3 WEEKS
NT	1.1MM	NORMAL

Congenital anomalies not detected.

All congenital anomalies cannot be detected by this study in a single scan, in present fetal position. Findings are conditional to machine resolution.

Good placental reaction seen. Placenta anterior in location covering the internal os.

Uterine artery doppler

Right - NORMAL Left - NORMAL

**Impression-** live fetus with mean gestational age - 12.3 WKS

**I declare that while undergoing the ultrasound examination I have neither declared nor disclosed the sex of the fetus to anybody in any manner.** All anomalies can not

maternal factors like amount of liquor, obesity, previous scar, advanced gestational age etc. Fetal conditions like multiple pregnancies, fetal positions, late appearance of few anomalies etc. Absence of anomaly on sonography does not absolutely rule out the possibility of having one. The opinion reported is based on data generated by computer
