Age - 32 Y/P

Double Monkey

DOB - 15/3/1992

CMP - 30/4/2025

Height - 5'3"

Weight - 54 kg

MIRACLE COMPLEX, BUS STAND, DURG (C.G.) PH. : 0788-4040925, Mob. : 6260752002

ANC SONOGRAM (INT SCAN)

Single live intrauterine foetus with variable presentation is seen at the time of examination.  
Placenta : Posterior

Cervical length: 3.8 cm. Internal OS closed.

CRL measures 6.43 cm. Corresponds 12 weeks 6 days.

Foetal cardiac activity seen. Foetal heart rates 159 B/min. regular.

Nuchal Translucency (NT) measures: 1.1 mm, within normal limits.

Nasal bone seen with nasal bone length of 2.4 mm.

Ductus venosus reveals normal flow & spectral waveform.

No evidence of tricuspid regurgitation.

Bilateral uterine arteries show normal wave form and doppler indices. Diastolic notch is absent.

| Peak Systolic                     | - | 20.73 cm/s |
| Peak Diastolic                    | - | 1.27       |
| Pulsatility Index PI              | - | 0.66       |
| Resistive Index RI                |   |            |

**IMPRESSION**

- Single live intrauterine foetus with variable presentation is seen at the time of examination, which corresponds, to Gestational age 12 Weeks 6 days, EDD- 30.01.2026 +/- 10 Days.
- **Maternal** - Simple left ovarian cyst measuring approx 4.2 x 2.4 cm.

Advice: Anomaly scan at 18-22 weeks.

Advice - Anomaly scan at 11-22 weeks

**Disclaimer:**  
I have seen that baby, which has certain limitations (anatomical). Total anomalies may not get diagnosed due to nature of anomaly. Fetal position and limitations of machine may influence the outcome of fetal anomaly in study does not always rule out its possibility. (Fetal or he is not included in this scan)  
I declare that while conducting this anomaly scan / image, I have scanned the patient in a manner that I believe to be the best of her fetus in any manner.

**Declaration:**  
I have not used any tool that is not allowed the job of her fetus in any manner.
