OB MID/Full Term

	Value	GA	EDD
BPD	33.88 mm	16w2d	07-02-2026
HC	126.79 mm	16w3d	07-02-2026
AC	100.82 mm	15w5d	12-02-2026
FL	19.72 mm	15w5d	11-02-2026
FHR	157.63 bpm		

Description

Sonography Report-Done on Sonotech Max Series Colour doppler.

- Single live Intrauterine Gestation seen in changing lie & presentation.
- Fetal cardiac activity & somatic movements well appreciated.
- Stomach bubble seen & Fetal UB well distended.
- Placenta with maturity grade I/II.
- Fetal spine seen on maternal side.
- Liquor Adequate.

I have neither detected the sex of the fetus nor disclosed the same to any body in any manner. All congenital anomalies are not possible to detect by Sonography due to various reasons i.e. quantity or liquor, fetal positions etc.

Conclusion

ST: SINGLE LIVE FETUS OF A.G.A. 16 WEEKS 0 DAYS. WITH DELAYED CONCEPTION
