Dr. Ratnesh Kumar Singh
M.B.B.S., M.D. (Radio-Diagnosis)
Diploma - N.I.C.E.R., New Delhi
Ultrasonologist & C.T. Specialist
CONSULTANT IN IMAGING MEDICINE

ULTRASOUND MULTISLICE SPIRAL C.T. SCAN

PATIENT'S NAME : MRS MANJU YADAV

AGE 37 YRS/SEX : F

REQUESTED BY : DR R K GUPTA MS

DATE 8.09.2025

USG WHOLE ABDOMEN

LIVER : is enlarged in size, shape & contour. Surface is smooth. Parenchymal echotexture is heterogeneous & abnormal due to fatty liver & attenuation of sound beam seen posteriorly. Hepatic vascular and biliary channels are normal. No focal lesion seen. Configuration of the liver is normal and normal portal vein seen measuring 12 mm.

GALL BLADDER : is normal in shape & contour. Wall thickness is normal. Lumen is echofree. No stones or sludge seen. Biliary ducts are within normal limits.

PANCREAS : is normal in size, shape, contour. Parenchymal echotexture is homogeneous & normal. No focal lesion seen. Main pancreatic hilum shows normal vessels.

SPLEEN : is normal in size, shape, contour and parenchymal echotexture. No focal lesion seen. Spleen is normal in size, shape, contour and parenchymal echotexture. No focal lesion seen.

PERITONEAL CAVITY : No free fluid seen in peritoneal & pelvic cavity. No free fluid seen in both pleural recesses. No retroperitoneal lymphadenopathy seen.

THORACIC & ABDOMINAL AORTA are normal in caliber & course.

BOTH KIDNEYS : are normal in size, shape, contour and location. Cortical parenchymal echotexture are normal and corticomedullary differentiation are well maintained. Central collecting systems are compact. No calculus seen. Right kidney measures 94x41 mm. Left kidney measures 99x43 mm in size.

URINARY BLADDER : is well filled. Wall thickness is normal. Contents are echofree. No growth or mass seen. No diverticulum seen.

UTERUS : is anteverted & normal in size, shape, contour. Serosal surface is smooth. Myometrial echotexture is homogeneous. Endometrial echo measures 7 mm in thickness & cavity is empty. Uterus measures 81x40x49 mm in size. Cervix is normal in size, shape & contour & homogeneous echotexture.

BOTH OVARIES : left ovary is normal in size, shape, contour and normal in parenchymal echotexture and measures 28x17 mm in size. Right ovary is normal in size, shape, contour and normal in parenchymal echotexture it measures 27x18 mm in size. No free fluid seen in cul-de-sac.

No free fluid filled, tubular structure seen in right iliac fossa along with compression tenderness is present & mild surrounding edema measuring 66x14x11 mm in size.

IMPRESSION : USG IMAGE MORPHOLOGY FINDINGS ARE IN FAVOUR OF MILD APPENDICITIS ALONG WITH MILD SURROUNDING EDEMA & MILD HEPATOMEGLALY DUE TO FATTY LIVER. Please correlate clinically & by other investigations. For reference.
