OP: EARLY LIVE PREGNANCY OF 16 WEEKS 0 DAYS OF GESTATION.

ADV. - FOLLOW-UP.

DR. MUKESH K. JAIN

Consultant Radiologist

DR. ABHIJEET JAIN

Consultant Radiologist

Note : Detailed fetal anomaly (especially extremities) may not always be visible due to technical difficulties related to fetal position, age, amniotic fluid volume, fetal movements, abd. Wall thickness and scar etc. Therefore all fetal anomalies may not necessarily be detected at every examination.
Adv : Targeted level II anomaly scan for detailed structural fetal study / Blood markers. In case of typing error contact Lab for corrected reports.

96 SLICE CT SCAN * DIGITAL X-RAY * SONOGRAPHY * OPG * PATHOLOGY * ECG
