LAB REPORT

ISO Certified
Medical Laboratory

Email: drsantanu667@gmail.com

Name : Mrs. FARZANA QUADRI

Age & Sex : 67 Year | Female

Lab Ref No : APL / 000103 /25

Referred by : Dr.Imtiyaz Ahmad,MD

APL / 000103 /25

Collection Time : 22-09-2025 09:05:54 PM

Receiving Time : 22-09-2025 09:05:54 PM

Reporting Time : 22-Sep-25 21:07:14

Test Name	Results	Units	Biological Ref. Interval
SEROLOGY			

VIRAL MARKER

HIV 1 & 2 screening
(Rapid Immunochromatographic) NEGATIVE

HBsAg Rapid Test
(Rapid Immunochromatographic) NEGATIVE

HEPATITIS C ANTIBODY (Anti-HCV)
(Rapid Immunochromatographic) NON-REACTIVE

HIV 1 & 2
This is Screening Test
Kit Used :- HIV TRI DOT

HIV 1+2 is a rapid test , meant for initial screening purpose only . A positive test must be reconfirmed following the Recommended diagnostic strategies as per the WHO guidelines .Like other diagnostic tests,a definite clinical diagnosis should be avoided on results of a single test . A complete evaluation by physician is mandatory . Anon reactive results with this test also does not preclude the possibility of HIV infection . Arecognised confirmatory procedure e.g. PCR, immunofluorescence or Western Blot should be used to verify the test results .

HBsAG
This is Screening Test
Kit Used :- Hepa.Card

HbsAg Card Method is only a screening test.All reactive samples should be confirmed by confirmatory test.Therefore for a definitive diagnosis,the patient clinical history,symptomatology as well as serological data,should be considered..

ANTI HCV
This is Screening Test
Kit Used :- HCV TRI DOT.

The 4th generation HCV TRI-DOT detects anti HCV in human serum or plasma and is only a screening test. All reactive samples should be confirmed by supplemental assays like RIBA.Therefore for a definitive diagnosis, the patient clinical history ,symptomatology as well as serological data ,should be considered.
