(P.T.O.)

# PARGAON SONOGRAPHY CENTRE

At Post-Pargaon (Salu-Malu), Tal-Daund, Dist-Pune 412203.

Mob.: 8605305536 / 8605475536

FETAL 2D ECHO, USG GUIDED FNAC, 3D/4D SONOGRAPHY, COLOUR DOPPLER

## Doppler - Maternal uterine arteries

	Right uterine artery	Left uterine artery	Mean PI	Remarks
Pulsatility Index (PI)	1.32	2.71	2.01	Normal

## IMPRESSION :

- Single live intrauterine gestation of 12 weeks 5 days by LMP.
- Placenta developing anterior, low lying reaching upto internal os - Suggest follow up for placental migration.
- NT scan is normal.

## SUGGESTION:

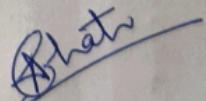

Detailed anomaly scan with integrated testing combining second trimester biochemistry and Genetic Sonogram to assess for markers and defects for chromosomal abnormalities.

All congenital anomalies are not detected by sonography and are subject to fetal position and advanced gestational age. All measurements including birth weight are subject to statistical variations.

\* I Mrs. JAGRUTI AMIT JEDHE, declare that by undergoing ultrasonography/image scanning etc. I do not want to know the sex of my fetus.

Signature of pregnant women \* J. A. Jedhe

I, DR. ARCHANA GHATE, declare that while conducting ultrasonography/image scanning etc. on Mrs. JAGRUTI AMIT JEDHE, I have neither detected nor declared sex of her fetus to anybody in any manner.

Investigations have their limitations. Solitary pathological / radiological and other investigations never confirm the final diagnosis. They only help in diagnosing the disease in correlation to clinical symptoms and other related tests. Please interpret accordingly.
