Name:- MITALI SAHU

Age :- 33 yrs/Sex:- Female

Refd by:- DR. P N GOGOI

Date :- 06 / 10 / 2025.

USG OF PREGNANCY(ANOMALY SCAN)

FETUS: Single live fetus seen at **variable** presentation at present.

FETAL PARAMETERS:

BPD: 53.68 mm corresponds to 22 weeks 02 days

HC: 205.99 mm corresponds to 22 weeks 05 days

AC: 191.77 mm corresponds to 23 weeks 06 days

FL : 41.86 mm corresponds to 23 weeks 04 days

FHR : 145 bpm.

Fetal weight : 641 +/- 99 grams.

CORD AROUND THE NECK : Absent.

LIQUOR :Liquor volume is normal. AFI = 17.34 cm

PLACENTA : Placenta is in anterior wall of body uterus. It is not low lying.

- A well defined hypoechoic lesion is noted in posterior myometrium measuring approx. 3.8 x 2.3 cm showing sparse vascularity on colour Doppler study suggestive of Uterine fibroid (FIGO 4)

No gross fetal congenital malformation could be seen.
