| Trisomy 21                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                   |                                 |                                |
| <p><b>The calculated risk for Trisomy 21 (with nuchal translucency) is below the cut off, which indicates a low risk.</b></p> <p>After the result of the Trisomy 21 test (with NT) it is expected that among 316 women with the same data, there is one woman with a trisomy 21 pregnancy and 315 women with not affected pregnancies.</p> <p>The PAPP-A level is low.</p> <p>The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value!</p> <p>The patient combined risk presumes the NT measurement was done according to accepted guidelines (Prenat Diagn 18: 511-523 (1998)).</p> <p>The laboratory can not be hold responsible for their impact on the risk assessment ! Calculated risks have no diagnostic value!</p> |                   |                                 |                                |
| <p>The graph illustrates the risk of Trisomy 21 based on maternal age. The x-axis shows age from 13 to 49, and the y-axis shows risk from 1:10 to 1:10000. A red area at the top represents risk above the cut-off. A yellow area below the red represents risk below the cut-off but above the age risk. A green area at the bottom represents risk below the cut-off. A vertical black line at age 29.6 indicates the patient's age risk of 1:852, which is below the cut-off.</p>                                                                                                                                                                                                                                                                                                                                                                                         |                   |                                 |                                |
| Trisomy 13/18 + NT                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                   |                                 |                                |
| <p><b>The calculated risk for Trisomy 13/18 (with nuchal translucency) is 1:852, which represents a low risk.</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                   |                                 |                                |
