

TEST REQUISITION FORM (TRF) 

Patient Details (PLEASE PRINT, ALL INFORMATION REQUIRED)
Name: Moh Yeeh Ramon S Maikha
Age: 72 Sex: F Race: Hispanic
Date: 11/11/2018 Time: 10:00 AM Ref: 1000000000

Specimen Details
Sample Collection Date: 11/11/2018 Patient's Temperature: 98.6
Sample Collection Time: 10:00 AM Fasting Status: Yes
Test Name / Test Code: Fast Plasma / Test Code

Client Details
Client Name: Shawna Lab
Client Address: 1000000000
Client Phone: 1000000000
Ref Doctor Name: 1000000000
Ref Doctor Address: 1000000000
Ref Doctor Phone: 1000000000

Sample Type
Sample Type: EDTA 10ml 10ml
Sample ID: 1000000000 1000000000 1000000000
Sample Barcode: 1000000000 1000000000 1000000000

Handwritten Notes:
Double Marker
Height: 5.2 feet
Weight: 151 kg
DOB: 02/08/2005

Footer:
No. of Samples Received: 1
Received by: 1000000000

Patient ID:	211343	Patient Name:	MEHREEN SHAIKH
Age:	22 Years	Sex:	F
Referring Physician	DR. VIKRAM LOKHANDE	Study Date:	25-Nov-2025

OBSTETRIC SONOGRAPHY

LMP: 15/08/2025 (14wks & 4 days)

LMP EDD: 22/05/2026

There is a single intrauterine gestation seen.
Fetal pole showing good cardiac activity is noted.
FHR is 157bpm
CRL measures 64.7 mm corresponding 12 weeks & 6 days .
Fetal calvarial mineralization appears adequate.
Nasal bone seen and appears normal.
Nuchal translucency measures 1.2 mm.
Ductus venosus is identified and shows normal flow pattern.
All four limbs are well seen. Stomach bubble and urinary bladder are seen.
Spine appears normal. No evidence of tricuspid regurgitation.
Cervix measures mm. internal os is closed.
No obvious adnexal pathology seen.
The placenta is posterior low lying
The liquor is normal

Blood vessels	RI	PI	S/D
Right uterine artery	0.60	1.08	2.51
Left uterine artery	0.48	0.71	1.91

IMPRESSION:-

- Early single live intrauterine pregnancy of 12 weeks and 6 days gestation (gestational age assigned as per CRL). No obvious structural anomaly noted at present.

Advice: TIFFA scan at 19 weeks.
