Dr. Pratap Singh
Consultant and Professor
M.D. (R.D.), D.N.B.
Special Duty : After Government Duty

Address : Infront of Bundelkhand Medical
College Gate No. 1, Tili Road, Sagar
Ph : 07562-236407
Mob : +91 799 950 6205

Patient Name	MUNNI SEN	Age/Sex	55 Y/F	Date	19/11/2025
Referred by	DR. SMT. KAVITA GAHLOT (M.S.)				

ULTRASOUND WHOLE ABDOMEN (FEMALE)

(Gaseous abdomen)

Liver : is enlarged in size (154 mm) with increased echogenicity.

Gall bladder : Appears partially contracted. Portal vein & Common Bile Duct are showing normal caliber.

Pancreas : is normal in size , shape and echotexture in visualized part. **Spleen** : is normal in size (87 mm) with normal shape and echotexture.

Both kidneys appear normal in size (Rk - 114 x 50 mm & Lk - 101 x 34 mm) , shape and increased echogenicity in both kidney. Two calculi noted in right kidney (of sizes - 14 mm & 10 mm). Right kidney - with calyceal fullness in all pole.

Urinary bladder : is filled with normal anechoic lumen.

Uterus is bulky and enlarged in size (103 x 66 x 35 mm , ET - cannot be evaluated) with Uterine decent & myometrium calcification (endometrial cavity area is sub optimally visualized) & free fluid like cystic area with few anechoic & few isoechoic area with in ? likely representing ? Pyometra ? Chronic hydrometra ? Hematometra. Bulky & hypoechoic cervical region with altered echogenicity and internal vascularity. S/O --- ? Chronic cervicitis ? Mitotic etiology.

- Both ovaries not visualized due to obscured by bowel gas artifact . No separate blind ended tubular structure noted in visualized part of RIF region at time of scan. Minimal free fluid in cu - de - sac noted.

IMPRESSION :---

- Mild hepatomegaly with fatty liver grade - I.
- B/L increased renal cortical echogenicity with minimal hydronephrosis in both side with calyceal fullness in all pole in right side.
- Two right renal calculi (of sizes - 14 mm & 10 mm).
- Uterine decent

[Signature]

All liver & gall bladder diseases have clinical and biological limitations. Please co-relate radiological findings clinically and as well as with clinical and pathological investigations. Review should be requested in case of any dispute and disparity. This report is only radiological and cannot be used for legal purposes. All congenital anomalies could not be ruled out on ultrasound. This Report is not
