HISTOPATHOLOGY REPORT**Histopathology No.** HP 751/25**Specimen**

Gross

Core biopsy of prostateReceived 3 linear grey white cores of tissue
measuring 1.2 x 0.2 x 0.1 cm.

Entire tissue is submitted for processing.

Microscopy

Section shows cores of prostate tissue infiltrated by a tumor. The neoplastic cells are arranged in glandular pattern, small clusters & singly scattered. The cells are cuboidal to round at places, having enlarged oval hyperchromatic nuclei with inconspicuous nucleoli & moderate to abundant pale eosinophilic to clear cytoplasm. About 75 % of the tissue examined shows infiltration by the tumor.

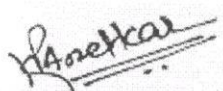

Opinion**Core biopsy of prostate - Adenocarcinoma.****Gleason's score - 4 + 3 = 7****Gleason grade group - Grade 3****Perineural invasion - Not identified.****75 % of the tissue examined shows infiltration by the tumor.**

Note: Specimen will be discarded after 1 month. Slides will be preserved for 5 years. Block/s is/are given with the report. Please preserve carefully.
