

**SANT BABA GURU GHASIDAS JI MEMORIAL  
GOVT. HOSPITAL, RAIGARH (C.G.)  
DEPARTMENT OF RADIODIAGNOSIS**

Name : *Sulochana .*

Age/ Sex : *66 yr / F*

Reg. No. : *2928*

UHID No. :

Date : *11/12/2025*

**CECT ABDOMEN+PELVIS (F)**

**REPORT :**

**Liver -** The liver is normally positioned and has normal size and smooth borders. Its internal structure and attenuation values are normal. The intrahepatic and extra-hepatic bile ducts are normal.

**GB -** Gallbladder are unremarkable.

**Spleen -** The spleen is orthotropic and of normal size. It has smooth outer contours and a homogeneous internal structure.

**Pancreas -** The pancreas is normal in size, position and internal structure with smooth, lobulated outer contours. The pancreatic duct is unobstructed. *Normal.*

**Kidney -** Both kidneys show normal in size and position. The renal parenchyma shows normal width and structure. The renal pelvis and calices show a normal configuration. The urinary drainage tract is unobstructed.

**Adrenal gland -** Adrenal gland is normal in size, position and internal structure.

**U.B.-** Normal thin walled, there is no Calculi. *There is a large well defined hypodense cystic lesion with thin enhancing wall measuring 9.2 (AP) x 11.4 (TR) x 12.1 (CC) cm in size.*

**Uterus-** Uterus is normal in size, position and internal structure. Bilateral adnexa normal.

*Post hysterectomy status.*

*noted in Rt lumbar region.*

- Major blood vessels appear normal, and there is no evidence of lymphadenopathy. *Subhepatic*

- Images portions of the lung and soft tissues are normal.

*and antecolonic to ascending colon compressing IVC post.*

- No obvious abnormalities seen in opacified bowel loops.

- Visualized part of musculoskeletal structures appears normal.

**IMPRESSION :** ① *Pseudocyst at Rt lumbar Region.*  
② *Simple hepatic cyst at Lt lobe (2.3 x 1.7 cm)*  
③ *minimal pelvic collection/Ascites.*

**DEPARTMENT OF RADIODIAGNOSIS & IMAGING**  
**SANT BABA GURU GHASIDAS JI MEMORIAL**  
**GOVT. HOSPITAL, RAIGARH (C.G.)**

Patient's Name : Mr. Sulochana S/o \_\_\_\_\_ Age : 66 Yrs, Sex: Female  
 UHID No. 00013 OPD/ IPD No. \_\_\_\_\_ Date 10/12/2025  
 Referred by: Department Surgery Unit : II Dr. Rakesh

**USG ABDOMEN**

**Liver:** Normal in size and echogenicity. No evidence of any intrahepatic biliary dilation. Hepatic veins and intrahepatic IVC are normal. No evidence of any obvious focal lesion in the liver. Portal vein branches are normal. CBD appears normal. (N)

**Gall Bladder:** Partially distended and normal in wall thickness. No e/o calculus or cholecystitis. (N)

**Pancreas:** is normal in size and echogenicity. No evidence of any obvious calcification. Pancreatic duct is normal. (N)

**Spleen:** Normal in size and echogenicity. No evidence of any obvious focal lesion in the spleen. (N)

**Right Kidney-** Normal in size and cortical echogenicity. The cortico-medullary differentiation is well maintained. No evidence of any obvious calculus or hydronephrosis. (N)

**Left Kidney-** Normal in size and cortical echogenicity. The cortico-medullary differentiation is well maintained. No evidence of any obvious calculus or hydronephrosis. (N)

A large well defined cystic lesion with moving echoes measures 7.8 x 11.2cm x 9.9 cm noted in abdominal cavity in Trihepatic region superior abutting liver posteriorly displacing Rt-kidney.

**Urinary Bladder:** Well distended with smooth outlines. No evidence of any calculus or cystitis.

**Uterus:** Anteverted and appears normal in size, shape and echotexture, measures \_\_\_\_\_ CC. Endometrial thickness measures \_\_\_\_\_ mm. No evidence of any mass lesion or fibroid. Endometrial cavity is empty.

No obvious bowel pathology seen.  
 No evidence of any obvious retroperitoneal or mesenteric lymphadenopathy.  
 No evidence of any free fluid in the peritoneal cavity.

**IMPRESSION:** Feature s/o Bd Pseudocyst.

**Advice -** CECT Abdomen + Pelvis

 Sant Baba Guru Ghassidas Ji Memorial  
 Govt. Hospital Raigarh (C.G.)

The science of radiological diagnosis is based on the interpretation of various shadows produced by the normal and abnormal tissues and are not always conclusive. Further biochemical and radiological investigation and clinical correlation is required to enable the clinician to reach the final diagnosis. The report and films are not valid for medico-legal purpose.
