Client Information	Specimen Information	Client/Doctor Information
Name : Mrs. AJISHWARIA AMIN	Visit ID : LSLN101856	Client Code : S150756
Age/Gender : 32 Y 0 M 3 D /Female	Collected : 08/Nov/2025 09:26	Client Name : S15 HRUDAYAM CLINIC
PhoneNo : 9309279512	Received : 08/Nov/2025 09:38	Client Add. : RAMDASPETH
ID : LDAA04392554	Reported : 08/Nov/2025 10:45	Client No. : 8424017935
Address :	IP/OP/Barcode :	Ref Doctor : Dr. Roshni Rath
	Report Status : Final Report	

Test Name	Result	Bio. Ref. Range	Unit	Method
-----------	--------	-----------------	------	--------

hCG, Serum	1,615.00		mIU/mL	ECL/Sandwich
------------	----------	--	--------	--------------

Interpretation:	
PREGNANT FEMALE - APPROX. GESTATIONAL AGE (WEEKS POST CONCEPTION)	APPROXIMATE hCG RANGE (mIU/mL)
3 weeks	5-50
4 weeks	5-426
5 weeks	18-7,340
6 weeks	1,080-56,500
7 weeks - 8 weeks	7,650-229,000
9 weeks - 12 weeks	25,700-288,000
13 weeks - 16 weeks	13,300-254,000
17 weeks - 24 weeks	4,060-165,400
25 weeks - 40 weeks	3,640-117,000
Non-pregnant female	≤1.0

hCG is produced in the placenta during pregnancy. In non-pregnant women, it can also be produced by tumors of the trophoblast, germ cell tumors with trophoblastic components and some non-trophoblastic tumors.

Elevated values here serve as an indication of chorionic carcinoma, hydatidiform mole or multiple pregnancy. Depressed values indicate threatening or missed abortion, ectopic pregnancy, gestosis or intra-uterine death.

For diagnostic purposes, the results should always be assessed in conjunction with the patient's medical history, clinical examination and other findings.

Values are marked with *, they are critical values.

NAME	Mrs. Aishwarya Amin	AGE	32 yrs	SEX	Female
Ref. by	Dr. Roshni Rathi	DATE	18/11/2025	OPD	OPD
EXAMINATION PERFORMED - USG EARLY PREGNANCY					

LMP: 06/10/2025

GA BY LMP: 6 weeks 2 days

EDD BY LMP: 13/07/26

Uterus appears anteverted, enlarged and the uterine cavity shows single intrauterine gestational sac with good chorionic decidual reaction and double decidual sign.

Myometrium appears homogenous.

Gestational sac measures 1.90 cm corresponding to 6 weeks 6 days

Yolk sac seen and measures 3.2 mm

Fetal pole seen. CRL measures 3.90 mm corresponding to 6 weeks 2 days seen.

Fetal cardiac activity appreciated. FHR- 108 bpm regular

Right ovary- Corpus luteum seen

Left ovary- Normal.

Cervical length- 4.37 cm

Conclusion: Single live intrauterine gestation of 6 weeks 2 days seen.

F/u after 6 weeks for NT/NB scan.
