

Prisca 5.1.0.17
Date of report: 16-01-2026

Patient data			
Name	Mrs. APARNA MOG	Patient ID	0812601110003
Birthday	04-05-1989	Sample ID	B2778755
Age at sample date	36.7	Sample Date	11-01-2026
Gestational age	11 + 3		
Correction factors			
Fetuses	1	IVF	no
Weight	69	diabetes	no
Smoker	no	Origin	Asian
		Previous trisomy 21 pregnancies	unknown
Biochemical data		Ultrasound data	
Parameter	Value	Corr. MoM	
PAPP-A	3.22 mIU/mL	1.56	
fb-hCG	52 ng/mL	1.03	
Risks at sampling date			
Age risk	1:176	Crown rump length in mm	49.7
Biochemical T21 risk	1:2511	Nuchal translucency MoM	1.04
Combined trisomy 21 risk	1:8301	Nasal bone	present
Trisomy 13/18 + NT	<1:10000	Sonographer	NA
		Qualifications in measuring NT	Sonographer
Risk		Trisomy 21	
The graph illustrates the risk of Trisomy 21. The y-axis shows risk levels from 1:10 to 1:10000. The x-axis shows gestational age from 13 to 49 weeks. A red region at the top indicates risk above the cut-off. A yellow region in the middle indicates risk below the cut-off but above the age risk. A green region at the bottom indicates risk below the cut-off. A black vertical bar at age 37 shows the patient's risk level, which is below the cut-off.		The calculated risk for Trisomy 21 (with nuchal translucency) is below the cut off, which indicates a low risk. After the result of the Trisomy 21 test (with NT) it is expected that among 8301 women with the same data, there is one woman with a trisomy 21 pregnancy and 8300 women with not affected pregnancies. The calculated risk by PRISCA depends on the accuracy of the information provided by the referring physician. Please note that risk calculations are statistical approaches and have no diagnostic value! The patient combined risk presumes the NT measurement was done according to accepted guidelines (Prenat Diagn 18: 511-523 (1998)). The laboratory can not be held responsible for their impact on the risk assessment ! Calculated risks have no diagnostic value!	
Trisomy 13/18 + NT			
The calculated risk for trisomy 13/18 (with nuchal translucency) is < 1:10000, which represents a low risk.
